CLEVER ENGINEERING

OUR SEVICES

- Industrial and Domestic Wastewater Treatment Systems
- Chemical and Advanced Biological Treatment Processes
- Anaerobic Treatment and Biogas Production Technologies
- Biogas Energy Plant Installation and Operation
- Biological and Chemical Desulfurization (H₂S Removal)
- Sludge Dewatering, Disposal, and Odor Control
- Plant Modernization, Revision, and Capacity Increase
- Engineering, Design, Consultancy, and Supervision Services

Wastewater Treatment Systems

For the design of wastewater treatment plants, there are criteria such as wastewater flow rate, wastewater characteristics, sectoral parameters, discharge standards, etc. Our company examines all design criteria before designing the treatment plant. In the light of the data obtained, the correct process selection is made by considering the minimum cost and maximum efficiency.

Project Design and Engineering Services

Clever Engineering is a leading provider of engineering solutions and comprehensive project design services that exceed industry standards. With our professional staff, extensive industry experience and technical expertise, we successfully complete our clients' most complex projects. We maintain our leading position in the sector with our customer satisfaction-oriented approach and innovative solutions.

Gas Treatment

Gas treatment is often used in various industrial processes, power generation, chemical production, waste management and many other applications. Gas treatment can include the removal of various contaminants, moisture, carbon dioxide, sulfur dioxide and other unwanted components. CLEVER ENGINEERING is a leading provider of biological desulphurization, chemical desulphurization and odor removal services, contributing to the smooth operation of treatment plant and biogas plants.

Biogas Energy Plant

The biogas plant consultancy and operation service provides expertise and guidance at a number of stages: planning, design, construction, operation and maintenance of the plant
